Puerto Rico	9,988	\$8,490	5,773	7,131	8,490	9,848	11,207

Note--The estimated U.S. median income for 4-person families is \$59,981 for the period of October 1, 2001 through September 30, 2002.

Eighty-five (85) percent of each State's estimated median income for a 4-person family is multiplied by the following percentages to adjust for family size: 52 percent for one person, 68 percent for two persons, 84 percent for three persons, 100 percent for four persons, 116 percent for five persons, and 132 percent for six persons. For family sizes greater than six persons, add 3 percent for each additional family member and multiply the new percentage by the State's estimated median income for a 4-person family.

Prepared from the March 2000 Current Population Survey, 1990 Census of Population and Housing and 1999 per capita personal income estimates, by state, Bureau of Economic Analysis. Puerto Rico data provided by the Puerto Rico Federal Affairs Administration.
